

Canadian Society of Questers
Fall Conference 2011
September 23 - 26, 2011
Prestige Harbourview Resort, Salmon Arm, BC

Speaker Biographies, Presentation and Workshop Information

Speakers:

ANDREW BASIAGO

Andrew D. Basiago, a lawyer, writer, and 21st century visionary, is our keynote speaker. Andy, the founder of Project Pegasus and president of MARS, is an emerging figure in the Truth Movement who is leading a campaign to reveal the secret US time travel capability and secret US presence on Mars. A popular guest on Coast to Coast AM, Andy is a brilliant orator who has been hailed as "The Herald of the Time-Space Age."

GINGER BOWLER

MICHELLE & ROLLAND GREGG

As a licensed HeartMath Practitioner, I'll guide you to connect consciously to your Energetic Heart. We'll cover HeartMath Institute's 20 years of research into psychophysiology, cutting edge biofeedback tools and will dive head first into the latest Advanced Water Research that directly relates to our experience of consciousness. Become an Active participant rather than simply reacting to

life's turbulence. Our own source of wisdom and guidance flows naturally through the intelligence of our own hearts!

CHARLYNE HARRIS/ PIETRO COMELLI

Charlyne's dowsing teachers include Dr. Jes Lim of QI-Mag International, Henry Dorst, & spiritual dowser Eric Dowsett. She and Pietro have taught many joint courses in Beginner Dowsing and Activated Garden techniques since 2001. With a degree in interior design & diplomain feng shui she practices feng shui design & uses dowsing as an integral part of her work. She has been teaching since 1998.

Pietro M. Comelli BSc., has studied advanced intuitive dowsing with international master Eric Dowsett. He teaches beginner & advanced dowsing techniques to better understand Geophysical, Metaphysical and Electromagnetic fields in our environments that affect our personal health & well being. Pietro has been practicing his craft since 2001.

CAROL HEYWOOD

My open third eye allows me to see what is happening in the causal plane that is on the way to the physical realm. I had an amazing experience during the full lunar eclipse on June 15 this year and I was able to very clearly see new mechanisms at work that are kicking the evolutionary process into a higher gear.

I am the president of the Canadian Society of Questers. I also serve as the person who finds speakers on the conference committee so I hesitated to put myself into the line-up. However, my guides were so insistent about the benefits of sharing this information at this conference that I am getting out of the way to make this presentation.

LAINI LASCELLES

My talk will entail how we can heal ourselves from our stories. It's through our story and issues that we learn our Gifts! I will share my own issues as a residential school intergenerational survivor from the Original peoples of this Earth. As a First Nations woman I can share first hand the journey of the Spirit

and how deeply connected we are with our Ancestors and our roots!

Z-S LIVINGSTON

Trained by David L. Livingstone, Alpha and Omega Order of Melchizedek 1970 to 1987. Since 2002 he has written over 200 essays posted on www.educate-yourself.org/zsl on a wide range of scientific, metaphysical and spiritual subjects. ZS has been a member of Questers since 2003 and has spoken to Quester Chapters six times. He will be presenting on the essay topic: "Doomsday Is So Hard To Schedule!" The presentation will show how many of the pre-planned disasters have not gone the way they were intended to go.

JONATHAN RITCHEY

Jonathan Ritchey is a serial inventor and visionary committed to the environment. It was this passion that led him to experiment with many innovative technologies over the past 20 years resulting in more than 20 patents. He is the founder and President of Element Four Technologies, and founder and CTO of Exro Technologies Inc. As well, Jonathan has founded a non-profit Canadian Society called Freedom Water International. In 2006, OSTE (Science and Technology Council) honoured Jonathan with its Science and Technology Council "Innovator of the Year Award". www.elementfour.com

MARK SIERMACZESKI

Mark has always been a compulsive doodler. He never entertained the idea that it would one day be his livelihood. After years of attempting to conform to societal rules and expectations, his career in art happened on its own. Mark now works internationally as an artist and entertainer. He draws cartoons of people in the shiniest version of themselves. Although Mark uses high tech equipment, he relies heavily on intuition, humour, and empathy.

ERIC TINGSTAD

Eric Tingstad is a masterful GRAMMY award winning musician, composer and producer, whose thriving music career spans 30 years. Eric's passion for music became evident when at age 8 he made his first guitar from a block of wood that he strung with fishing line. His formal Segovian training led him into recording his first album of original music in 1981. He now has over 20 successful albums.

Discovering his natural musical talent for performing and composing so early in life allowed Eric to get an early start on tapping into his source of talent and inspiration. He has continued to develop processes for accessing his creative flow that have supported him and kept fresh new material coming throughout his long successful music career. Eric will share stories and information about that and then share some of his wonderful music with us.
